SUBJECT INDEX

N-Acetyl-*N'*-methyl aspartyl amide ion,
polarization analysis of *N*-acetyl-*N'*-methyl aspartyl amide ion and similar systems 313
ACQM theoretical calculation,
the ACQM theoretical calculation of ground state diatomic potential curves 165
Adamantane,
intramolecular non-bonded interactions and β- and γ-substituent ^{13}C NMR chemical shifts: application to series of adamantane and norbornane derivatives 189
Allenic double bonds,
structural variations in small ring hydrocarbons bridged by allenic double bonds 25
Amidosulfurous acid, $H_2N—SO_2H$,
ab initio calculations of amidosulfurous acid, $H_2N—SO_2H$ 335

Benzannelated annulenes,
phenanth and anth-fused benzannelated annulenes: a graph-theoretical study 325
Benzenoid molecules,
on recognizing Kekuléan benzenoid molecules 183
Benzylidene-aniline,
conformational analysis of *trans*-benzylidene-aniline. A non empirical study 403
Biological activity,
conformational properties of the analgesic peptide dermorphin and their relationships to biological activity 153
Biological receptors,
introduction of solvent effects in the electrostatic recognition of biological receptors 105

^{13}C NMR chemical shifts,
intramolecular non-bonded interactions and β- and γ-substituent ^{13}C NMR chemical shifts: application to series of adamantane and norbornane derivatives 189
Charge densities,
chemical shifts and charge densities in substituted nitrosobenzenes 399
Chemical graph theory,
chemical graph theory. Part VII. The use of Ulam sub-graphs in obtaining characteristic polynomials 363
CNDO/force method,
studies on self-association of nitromethane using a CNDO/force method 319
Conformational analysis,
ab initio conformational analysis and geometry optimization of cyclooctane and comparison with molecular mechanics results 93
conformational analysis of *trans*-benzylidene-aniline. A non empirical study 403
Conformational stability,
interaction of aromatic rings and conformational stability: molecular mechanics calculations on 1,2-diphenylethanes 407
Cyclooctane,
ab initio conformational analysis and geometry optimization of cyclooctane and comparison with molecular mechanics results 93

Dermorphin,
conformational properties of the analgesic peptide dermorphin and their relationships to biological activity 153
1,2-Diphenylethanes,
interaction of aromatic rings and conformational stability: molecular mechanics calculations on 1,2-diphenylethanes 407

Dispersion coefficients,
small GTO pseudostate calculations of multipole polarizabilities and dispersion coefficients between light atoms 289

Electron affinity,
calculations on the electron affinity of silylene (SiH_2) 309
Equilibrium structures of unionized amino acids,
reliability of AM1 in determining the equilibrium structures of unionized amino acids 299

Formamide,
ab initio valence bond studies for formamide 67
Furan,
comparison of the crystal- and gas-phase structures of furan: an ab initio study 175

Geometry optimization,
ab initio conformational analysis and geometry optimization of cyclooctane and comparison with molecular mechanics results 93
Graph-theoretical study,
phenanth and anth-fused benzannelated annulenes: a graph-theoretical study 325

Heats of formation of organic compounds,
the theoretical study of the heats of formation of organic compounds containing the substituents CH_3, CF_3, NH_2, NF_2, NO_2, OH and F 249
Hydrazinecarbothioamide,
theoretical investigations of the structural and chemical properties of hydrazinecarboxamide and hydrazinecarbothioamide 275
Hydrazinecarboxamide,
theoretical investigations of the structural and chemical properties of hydrazinecarboxamide and hydrazinecarbothioamide 275
Hydrogen-bonded complexes,
ab initio studies of hydrogen-bonded complexes between formic acid or methylacetate and HF or HCl 201
Hydrogen bonded systems,
MNDO/M calculations on hydrogen bonded systems 343
Hydrogen bonding,
hydrogen bonding and rotation barriers: A comparison between MNDO and AM1 results 379
Hyperpolarisabilities,
on the study of polarisabilities and hyperpolarisabilities with an unrestricted Hartree—Fock wave function, case study: HF^+ and HCl^+ 413

Ket calculation,
gauge-dependent ket calculation of the magnetic properties of molecules. Part 2. Rovibronic corrections and temperature dependence of screening constants in H_2 and CO 121

Lone-pair orientational effect,
analysis of the phosphorus lone-pair orientational effect on $^{31}P—^{13}C$ couplings in 7-(phosphamethyl)norbornene 1

Magnetic properties of molecules,
gauge-dependent ket calculation of the magnetic properties of molecules. Part 2. Rovibronic corrections and temperature dependence of screening constants in H_2 and CO 121
Molecular interactions,
long-range coefficients for molecular interactions 49
Molecular mechanics calculations,
interaction of aromatic rings and conformational stability: molecular mechanics calculations on 1,2-diphenylethanes 407
Monosubstituted cyclohexanes,
ab initio studies of structural features not easily amenable to experiment. Part 60. Comparison of the molecular structures of some axial and equatorial monosubstituted cyclohexanes 83
Multipole polarizabilities,
small GTO pseudostate calculations of multipole polarizabilities and dispersion coefficients between light atoms 289

$NaHe^+$,
energies and dynamical couplings of $^{1,3}\Sigma$ and $^{1,3}\Pi$ states of $NaHe^+$, modified with a common translation factor 136
Nitromethane,
studies on self-association of nitromethane using a CNDO/force method 319

Nitrosobenzenes,
chemical shifts and charge densities in substituted nitrosobenzenes 399
Norbornane,
intramolecular non-bonded interactions and β- and γ-substituent ^{13}C NMR chemical shifts: application to series of adamantane and norbornane derivatives 189

7-(Phosphamethyl)norbornene,
analysis of the phosphorus lone-pair orientational effect on $^{31}P—^{13}C$ couplings in 7-(phosphamethyl)norbornene 1
Phosphorus,
analysis of the phosphorus lone-pair orientational effect on $^{31}P—^{13}C$ couplings in 7-(phosphamethyl)norbornene 1
Polarisabilities,
on the study of polarisabilities and hyperpolarisabilities with an unrestricted Hartree—Fock wave function, case study: HF^+ and HCl^+ 413
Potential curves,
the ACQM theoretical calculation of ground state diatomic potential curves 165

Reaction ergodography,
reaction ergodography for the hydrolysis of urea 37
Rotation barriers
hydrogen bonding and rotation barriers: A comparison between MNDO and AM1 results 379
Rovibronic corrections,
gauge-dependent ket calculation of the magnetic properties of molecules. Part 2. Rovibronic corrections and temperature dependence of screening constants in H_2 and CO 121

Screening constants,
gauge-dependent ket calculation of the magnetic properties of molecules. Part 2. Rovibronic corrections and temperature dependence of screening constants in H_2 and CO 121
Silylene (SiH_2),
calculations on the electron affinity of silylene (SiH_2) 309
Small ring bridged hydrocarbons,
structural variations in small ring hydrocarbons bridged by allenic double bonds 25
Solvent effects,
introduction of solvent effects in the electrostatic recognition of biological receptors 105
Structural features,
ab initio studies of structural features not easily amenable to experiment. Part 60. Comparison of the molecular structures of some axial and equatorial monosubstituted cyclohexanes 83

Thiometalato complexes,
thiometalato complexes: electronic structures and the relation to their chemical and physical properties 211
Tricoordinate hydrides and halides,
on the inversion barriers of group 15 tricoordinate hydrides and halides: an ab initio study using analytical gradients 351
Triplet carbenes,
the reactivity of triplet carbenes: an ab initio study 17

Ulam sub-graphs,
chemical graph theory. Part VII. The use of Ulam sub-graphs in obtaining characteristic polynomials 363
Urea,
reaction ergodography for the hydrolysis of urea 37

Valence bond studies,
ab initio valence bond studies for formamide 67
